

**REMARKS/ARGUMENTS**

In the Office Action dated September 6, 2005, the Examiner identified the following inventions and corresponding claim groupings:

- I. Claim 2 drawn to composition of gas with melting point, classified in class 62, subclass 100.
- II. Claims 4 and 5, drawn to composition of gas with carbon dioxide, classified in class 62, subclass 100.
- III. Claims 6 - 20, drawn to method of proving a turbine meter, classified in class 73, subclass 1.16.
- IV. Claims 21 - 24, drawn to method for cooling the test medium, classified in class 73, subclass 1.01.

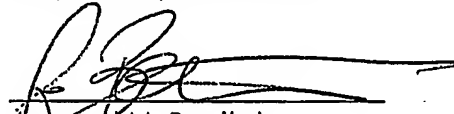

The Examiner has requested that the applicant elect one of the above-listed inventions to be examined.

The applicant is submitting the foregoing response in good faith to reply to the outstanding Office Action, but is not electing an invention for examination pending receipt of a revised supplemental restriction requirement to be issued by the Examiner. In a voice mail message dated October 4, 2005, Supervising Examiner Hezron Williams indicated that such supplemental restriction requirement would be issued in the near future and that the applicant could refrain from making an election until the receipt of same. The foregoing response has been prepared in compliance with the Supervising Examiner's instructions.

We await receipt of the supplemental restriction requirement.

Respectfully submitted,

October 6, 2005
